

AUTOVISION FUEL CARDS

With fluctuating fuel prices, it is increasingly difficult to control fuel costs. One of the greatest ways to mitigate your costs and identify fuel theft is to use the AutoVision Fuel Card.

The fuel card works like a credit card. Drivers are able to use them at gas stations when fueling their vehicles. This purchase information is sent back to your control centre automatically. Fuel cards allow you to keep track of the fuel costs for your fleet and give you access to detailed purchasing reports.

Using the fuel card, you are able to identify:

- > The purchase of too much fuel (over tank capacity)
- > Type of fuel purchased (diesel or gasoline)
- > Multiple daily fill-ups
- > Inappropriate purchases
- > Fueling patterns outside of historical transactions
- > Fueling outside the province
- > How often purchases are made

Did you know?

The AutoVision Wireless fuel card works with 65 vendors across Canada, including Co-op, Domo, Fas Gas, Petro-Canada, Shell, Husky and many others.

Key Benefits

- > Ensure efficient payment schedules
- > Reduce administrative work
- > Prevent fuel fraud by up to 15%
- > No need to reconcile employee fuel expenses
- > Set daily and monthly caps
